## SKILLS

- Languages** : Python, Java, C++, JavaScript, TypeScript
- Core Concepts** : DBMS, OS, CN, SQL, OOPs
- Databases** : MongoDB, MySQL
- AI & ML** : Pandas, NumPy, Scikit-learn, Model Evaluation, Feature Engineering
- LLM Exposure** : API integration, prompt-based workflows, AI-powered automation
- Tools / Platforms** : Git, GitHub, Jupyter Notebook, Docker, Firebase, GitHub Actions (CI/CD)

## INTERNSHIP

- Machine Learning Intern | Zidio Development | [Certificate](#)**
Jun 2025 - Jul 2025
- Improved model predictive accuracy by ~50% through advanced data preprocessing, feature engineering, and systematic hyperparameter tuning, leading to more reliable decision-making outcomes.
  - Designed and deployed scalable real-time inference pipelines handling low-latency predictions (<100 ms), enabling seamless integration into production environments.
  - Evaluated and optimized models using key statistical metrics (e.g., accuracy, precision, recall, F1-score), reducing error rates by ~30–40% and ensuring robust, production-ready performance.

## PROJECTS

- Mediconnect – Healthcare Booking Platform | [GitHub](#)**
Oct 2025
- Built a full-stack healthcare platform for medical product inventory and appointment booking using Node.js, Express, and MongoDB.
  - Developed an admin dashboard with Bootstrap to track stock levels, customer activity, and transactions in real time.
  - Deployed the application on AWS EC2 with PM2, ensuring high availability and reliable backend performance.
  - Implemented RESTful APIs for user authentication, cart operations, and order processing, improving system efficiency and scalability.
- Mental Health AI Predictor – AI Web Application | [GitHub](#)**
Dec 2025
- Engineered an end-to-end Machine Learning web application using Streamlit and Scikit-learn to automate depression screening with confidence-based severity prediction.
  - Systematized a modular architecture separating UI, configuration, and ML pipelines to improve maintainability and scalability across multi-page application workflows.
  - Enhanced a Random Forest classification engine with automated data preprocessing, feature encoding, and train-test evaluation for robust mental health analysis.
  - Implemented advanced data visualizations including correlation matrices, feature importance charts, and confusion matrices to enhance model explainability.
- LPU WiFi Auto-Login – AI Automation Tool | [GitHub](#)**
Nov 2025
- Automated WiFi authentication using Python, OpenCV, and PyAutoGUI, reducing manual login effort by 40%.
  - Enforced a computer vision pipeline to detect login screen dynamically and trigger secure credential entry.
  - Mechanized GUI interactions using PyAutoGUI to handle real-time login workflows across varying network states.
  - Scripted browser-based authentication workflows using PyAutoGUI to handle dynamic login interfaces and session recovery.

## CERTIFICATIONS

- Cloud Infrastructure Certified AI Foundations Associate | [Oracle](#)
  - Cloud Computing | [NPTEL](#)
  - Python Django Development | [CipherSchools](#)
- Apr 2026  
Sep 2025  
Feb 2024

## ACHIEVEMENTS

- Solved 500+ DSA problems, demonstrating strong problem-solving and algorithmic thinking.
- Completed Introduction to Generative AI | Google Skillshop (Badge).
- Successfully participated in CodeStorm Hackathon organized by LPU.

## EDUCATION

- Lovely Professional University**  
Bachelor of Technology-Computer Science and Engineering; CGPA: 7.51
- Punjab, India  
April 2023 - Present
